21% VAT and government levies included. These government levies apply to the current calendar year and only apply to a maximum annual consumption of 10,000 kWh electricity and 170,000 m³ gas. The energy taxes change if the annual usage is more than 10,000 kWh and 170,000 m³, which causes a change in the all-in tariff. The costs of your grid operator are processed directly into your monthly payment. You will receive a standard annual tax reduction of €376.08 including VAT for the supply of energy.

**Government levies: the costs for sustainable energy charged by the Dutch government to finance sustainable energy projects*
